

The Changing Landscape of Stroke Care

Educational Activity Target Audience and Objective

To educate emergency physicians, first responders and other hospital based EM practitioners on the latest evidence-based guidelines for treating stroke, provide stroke diagnostic criteria, dispel myths associated with tPA, identify and address barriers to administering tPA and to initiating timely endovascular therapy, and describe telemedicine/pre-hospital capabilities to improve timely care of stroke patients in our nation's emergency departments.

Faculty

Robert Dunne, MD, FACEP
Department of Emergency Medicine
St. John Hospital and Medical Center
Detroit, Michigan

Philip Levy, MD, MPH, FACEP
Department of Emergency Medicine
Wayne State University
Detroit, Michigan

Learning Objectives

After participating in this educational activity, participants will be able to:

- Identify key barriers that prevent acute ischemic stroke patients from receiving timely treatment
- Differentiate between and describe methods for identification of large vessel occlusions
- Explain Parallel Process and compare to current protocols in your practice
- Review Pre-Hospital Notification Procedures and regionalization of services/identification of stroke centers
- Describe a Stroke System of Care emphasizing the multidisciplinary approach for management of Ischemic Stroke
- Identify current AHA/ASA guidelines and updates as they apply to improving management of AIS in the ED

Developed and presented by the American College of Emergency Physicians
